## SKILLS

Java Spring Boot Angular

Agile PostgreSQL

Microservices DevOps / CI-CD

## LANGUAGES

Dutch — Native

English — Fluent

## SOFT SKILLS

Analytical thinking

Problem solving

Fast learner

Communicative

Assertive

Proactive

## PROFILE

Software Developer with a strong analytical mindset and experience in both frontend and backend development. Comfortable translating business requirements into technical solutions using Java, Spring Boot, and Angular.

## WORK EXPERIENCE

### Full Stack Developer Strouwi (deployed at Belfius Insurance)

06/2026 - Present

- Working as an external consultant for Strouwi, deployed on-site at Belfius Insurance to support two concurrent.
- Contribute across both development and DevOps: building and maintaining application features while supporting deployment pipelines and infrastructure needs.
- Adapt quickly across different codebases and technical contexts to deliver on shifting project priorities.
- Preparing to transition into ongoing production support as the current projects move toward completion.

### Java Developer Sopra Steria

09/2024 - 04/2025

- Developed an internal web application to help managers organize and track employee-related information.
- Built a full-stack CRUD dashboard using Angular, Spring Boot, and PostgreSQL.
- Enabled managers to schedule meetings, log notes per employee, and review past interactions in one place.

### Technical Software Engineer Cegeka

10/2021 - 08/2024

- Worked as a full-stack developer on the Groeipakket platform for the Flemish Government, managing citizen records and allowances.
- Developed and maintained microservices using Spring Boot and Angular within an event-driven architecture.
- Contributed to CI/CD automation and containerized deployments using Jenkins, Docker, and Kubernetes.
- Helped deliver a secure, modular interface enabling file managers to view, assign, and revoke benefits efficiently.

### Software Engineering Intern Devoteam

02/2021 - 05/2021

- Contributed to a Netflix-style microservice application as part of an internal training initiative for interns.
- Worked on backend and frontend components using Spring Boot and Angular.
- Gained hands-on experience with agile methodologies, teamwork, and iterative delivery.

## EDUCATION

### Bachelor Applied Informatics — Erasmushogeschool Brussel

01/2018 - 06/2021

Specialization: Software Engineering

## CERTIFICATES

### Volunteer Coder

10/2019

Contribution to the Red Cross Codeathon 6.0 in Brussels, Belgium.
